**BLACK RANGE RANGER DISTRICT**  
**2014 ANNUAL OPERATING INSTRUCTIONS**

**Santana Allotment**

**I. INTRODUCTION**

These Annual Operating Instructions document your discussion with Sean Brown and Shane Shannon on January 16, 2014 at the Black Range Ranger District Office.

**Permitted Use:**

<b>Permittee</b>	<b>Numbers</b>	<b>Season</b>
William and Loretta Rabenau	110 cattle, cow/calf	03/01 – 02/28

**Authorized Use:**

<b>Permittee</b>	<b>Numbers</b>	<b>Season</b>
William and Loretta Rabenau	100 cattle, cow/calf	03/01 – 02/28

**NOTE: Until proposed improvements, water developments and vegetation conditions show an improving trend, cattle numbers will be set to below permitted numbers.**

**Pasture Rotations:**

<b>Pasture</b>	<b>Number</b>	<b>On Date</b>	<b>Off Date</b>
Lower	100	03/01/2014	05/15/2014
Upper	100	05/16/2014	09/30/2014
Yaples	rest		
Middle	100	10/01/2014	10/31/2014
Lower	100	11/16/2014	02/28/2015
Santana	Shipping	11/01/2014	11/15/2014

**II. MANAGEMENT OF LIVESTOCK**

You are responsible for monitoring water availability and forage utilization. It is your responsibility to move your livestock when sufficient water is no longer available or when proper forage utilization is achieved in a pasture. You are responsible for keeping track of and maintaining control of your livestock. In the event your livestock are found to be out of the scheduled pasture, you will be required to find, gather, and return your animals to the proper pasture as soon as possible.

**III. IMPROVEMENT MAINTENANCE**

All range improvements assigned in the 10-year Term Grazing Permit are to be maintained in a functioning condition. In the event these improvements cannot be brought up to a functioning condition, you should notify the Range Staff at the Black Range Ranger District to schedule them for reconstruction as funds become available.

Range improvements are planned for the Santana Allotment during the 2014 grazing season

- 2 Rubbermaid 500 gallon drinkers for Murns and Alvin Springs
- Need Arch clearance for Rockheader in Little Bear.
- Continued maintenance of water developments, windmills, and corrals as needed to successfully facilitate the grazing operation.
- Permittee requested 500ft of 1" poly pipe for construction of elk crossings.
- Permittee requested .9 mile of fence material to complete the construction of the Franks Drift fence.
- Re-align/reconstruct # 002047 Fence to a better location. Will need to coordinate with the neighboring Allotment prior to project commencement.
- Big Pine dirt tank needs to be repaired.
- Bear Tank needs to be cleaned.

All range improvements assigned in the 10-year Term Grazing Permit are to be maintained in functioning condition. In the event these improvements cannot be brought up to a functioning condition, you should notify this office so we can schedule them for reconstruction as funds become available. You may apply for a "**Free Use**" post and stay permit for the maintenance of fences and corrals on the allotment. Maintenance to standard is required even if you have taken "**nonuse**".

#### **IV. GENERAL INSTRUCTIONS**

**1. Fire:** Branding and warming fires should be used with good judgment - not on windy days or during times when fires are specifically restricted. The Black Range District may allow naturally ignited fires to burn on the district this coming year. We will notify you if we plan to let a fire burn on your allotment.

**2. Records:** In order to close out permit modifications you must provide documentation of materials and labor constituting your contribution to the permit modification.

You must provide documentation of cattle numbers; dates of entering and leaving pastures, shipping dates and cattle losses (grown stock and calves). This information is used to substantiate the carrying capacity of the allotment. The information demonstrates use and the need for forage to meet the economic needs of the county. This information may also be used to establish cause and effect if there is a significant change in calf crop (Example, a wolf pack becomes established near your allotment).

**3. Heavy Equipment Use:** Please notify district well in advance of any plans to use heavy equipment so that necessary clearances and/or permits can be obtained. You will be notified by the district when you can proceed.

**4. Credit/Refund:** Any credit or refund applications for grazing fees must be made as far in advance as possible. Credit/Refund applications are not retroactive and will be approved only if the District Ranger is notified of livestock removal, prior to, or at the time, the livestock are taken off the allotment. **You will be required to provide your Social Security or Tax ID number in order for a refund to be processed.**

A \$25 administrative fee will be charged for any additional bills for collection that are sent to you due to either late payment or for split billing on seasonal allotments. This fee will be collected to pay for the cost associated with issuing an additional bill for collection. There is no administrative fee for the normal "split billing" on yearlong allotments.

It is necessary for you to write the bill number on your check prior to submitting it to the lockbox. This is necessary to insure that your payment is credited to your account.

**5. Short Age Calf Policy:** Any short-aged calves (calves less than 6 months old on December 31) must be removed from the National Forest by April 1, or you will need to apply for and pay grazing fees for these animals from April 1 to the time they are removed from the National Forest. Calves that are 6 months old or older on December 31 need to be paid for starting January 1.

**6. Salting and Supplemental Feeding:**

Salt should be placed in such a way as to distribute livestock use throughout the area. Place salt well away ( $>1/4$  mile) from any water sources, or key areas that traditionally receive heavy use such as roads, parks, and riparian areas. Place salt in areas of light use to draw cattle to those areas such as oak thickets or under the aspen, spruce or pine. Salt locations must be moved every year and do not place more than one block in a location. The best distribution can be obtained by scattering one-half block chunks in areas of light use. Salt or supplement will not be placed near areas where such placement is liable to result in conflicts with other Forest users. Pick-up your salt after livestock are rotated to the next pasture.

Any hay, straw, or supplemental feed used in association with your grazing permit must be certified and tagged as free of noxious weeds and/or noxious weed seeds.

**V. ALLOTMENT STATUS**

The National Environmental Policy Act (NEPA) process has been completed for this allotment.

**VI. OTHER ITEMS DISCUSSED**

The District Ranger will authorize necessary changes to this AOI to accommodate fire management.

**VII. SPECIAL MANAGEMENT CONCERNS**

Keep track of conditions on your allotment. Make plans to reduce or remove livestock if vegetative/watershed conditions could be substantially harmed due to continued grazing. The forecast for the upcoming winter and spring is drier than normal. If stock water does not recharge, adjustments may be necessary to the rotation plan.

**Wildlife and Fish**

There is protected and restricted Mexican Spotted Owl habitat on the Santana Allotment; however, consultation with the U.S. Fish and Wildlife Service determines there are no restrictions regarding the Mexican Spotted Owl.

Stock tanks must be surveyed for possible aquatic habitat before earth-disturbing maintenance is authorized.

The U.S. Fish and Wildlife Service listed the Chiricahua leopard frog as a threatened species in 2002. We have completed grazing consultation on your allotment regarding the effects of livestock grazing on the Chiricahua leopard frog. We determined that livestock grazing may have an affect but not adversely affect the Chiricahua leopard frog. As a result of this determination, there were no changes required of your grazing permit. The U.S. Fish and Wildlife Service concurred with this determination. Therefore, consultation has been completed. A copy of this consultation is on file with your local Ranger District.

## Heritage and Cultural

You must obtain permission from this office, before conducting earth-disturbing activities on the National Forest. The Forest Service will arrange inspections of project areas and will prepare appropriate environmental and cultural documents before earth-disturbing activities proceed. These activities include road/earthen tank maintenance, as well as construction/reconstruction of trails, roads, etc. Do not conduct any earth-disturbing activities on the Forest without written clearance from this office.

## VIII. UTILIZATION MONITORING OF KEY AREAS

### Monitoring Schedule (Current Management)

**Allowable Use:** (Standards by Pasture and Key Area)

Pasture	Key Area	Key Species	Allowable Use	
			Upland	Riparian
All	Grassland Openings	Bluegrass & native bunchgrass	30-40%	
All	Riparian Areas	Woody riparian species		Not to exceed 25%
All	During “growing season”	All riparian grass & sedge		35%
All	During “dormant season”	All riparian grass & sedge		40%

If allowable use is reached on any key area prior to the scheduled off date, you will need to immediately move your livestock to the next unit or off National Forest if that unit is the last in the rotation. This will usually necessitate beginning the move one or more days prior to reaching allowable use or the scheduled off date.

**Monitoring:** The range personnel will conduct allotment inspections each year to ensure compliance with the terms and condition addressed in the Term Grazing Permit, including the Allotment Management Plan and Annual Operating Instructions. The permittee may also schedule inspections at any time.

The idea of a key area is to find a site that is representative of a larger area in which cattle obtain the majority of their required forage resources. Key area monitoring will avoid areas directly adjacent to permanent water sources, cattle trails, roads, and fence lines.

Upland areas will be monitored for use on perennial grass species.

Mexican spotted owl protected and restricted habitat will be monitored to ensure that current management is providing cover for rodent prey species, the residual biomass that will support prescribed natural and ignited fires that would reduce the risk of catastrophic wildfire in the Forest, and regeneration of riparian trees.

District personnel will contact the permittees to coordinate site visits to monitor key areas. Permittee participation is encouraged. Forage utilization estimates will be consistent with the Forest Service Range Analysis Handbook methodology, and may also include FS Regional stubble-height standards, as well as other techniques generally accepted in the field of range management.

## IX. NEPA AND APPEAL RIGHTS

These Instructions implement the NEPA (National Environmental Policy Act) decision for the Santana Allotment dated September 30, 2008, and are not eligible for appeal under 36 CFR 214.

## X. Post and Stay

As the grazing permittee you are authorized to cut posts and stays for the maintenance of existing improvements within your allotment. This authorization will expire when the AOI expires on

February 28 2015, the end of the grazing season. All materials will be gathered from within the allotment. All materials will be used solely for the allotment and cannot be used for barter or personal gain. The trees shall be cut within the following guidelines:

- Juniper species only may be cut. No cutting of Oak or Pine species
- No cutting within 100 feet of a road
- No trees larger than 8 inches diameter at ground level shall be cut
- Stump heights shall be cut within 6 inches of ground level
- Lop and scatter slash so that it is within 12 inches of ground level.
